

Solstice Conference Just Got Even Better

Solstice Conference enhances video conferencing with rich, multi-participant content sharing to deliver a better collaboration experience between onsite and remote users.

Solstice version 5.1 enhances Solstice Conference by adding support for additional room A/V devices and full support for MacOS, delivering the convenience of a traditional room system with the flexibility to use virtually any conferencing service in more rooms than ever before.

Solstice 5.1 Features and Capabilities

- Full Solstice Conference Support for MacOS
- Expanded Support for Room A/V Devices
- Improved Solstice Conference Support for Windows Laptops
- Automatic Display Power Management Based on Room Occupancy
- Enterprise Certificate Management Tools
- Support for Microsoft O365 Modern Authentication

A New Class of Room System for the Hybrid Workplace

Now more than ever organizations need solutions that effectively and economically support the new blended workforce. Through rich multi-participant collaboration with agnostic conferencing support and a touchless meeting room experience, Solstice levels the playing field and improves collaboration between onsite and remote participants.

Availability and Requirements

Solstice version 5.1 software updates are available for all components of the Solstice product suite, including Solstice Pods, Dashboard, and all user apps. Visit mersive.com/download to access all updates.

All new Solstice Pods will ship with Solstice version 5.1 and will include the use of Solstice Conference for 1-5 years depending on the Solstice Subscription term. Don't have a Solstice Pod? Try Solstice risk-free for 30 days at mersive.com/trial.
