

Introduction

In 2020, Solstice Cloud expanded from deployment monitoring and analytics to include cloud management. With this expansion, customers can choose between Mersive’s legacy Dashboard platform or Solstice Cloud for Pod management. Solstice Cloud includes all the benefits of Dashboard with additional capabilities to provide admins an easy method for deploying and managing their entire fleet of Solstice Pods. Due to an enhanced user experience with robust capabilities and a continual innovative roadmap, Mersive recommends using Solstice Cloud; however, the comparison below will help each customer view the differences and decide which is best suited for their needs.

	<i>Solstice Dashboard</i>	<i>Solstice Cloud</i>
		
Requirements	<i>Enterprise Edition Pods</i>	<i>Enterprise Edition Pods Solstice version 4.5 or later</i>
Centralized Management	✓	✓ +
Scalable	✓	✓ +
